A Summary of Our Team's Project

- We decided to come up with this plan of circulating library because to help Non Parikrma students get the access to books and get to know the joy of reading.
- We got inspired by the British library which was in 1725-1966.
- <http://britishcirculatinglibraries.weebly.com/history.html>
- We wanted to curate the library and develop it .

OUR PILOT PLAN

- ❑ Our plan is to set up a circulating library in our schools and circulate the books to the students doorstep and help the community students to read books.

Our Team's Progress

- ❑ Approached school teachers and students for book donation .
- ❑ Books were donated from our school library and by our school teachers and students.
- ❑ Screening of books done by our school student volunteers .Namely – Devaraj -8th, Abubakar-8th , Devika-8th, Thanush-9th, and Yathish – 7th

CHANGES MADE IN OUR PLAN

- Our Initial plan was to approach private schools for book donation but later we got books donated from our own school.
- We gave books for Non-Parikrma students to get to know about the joy of reading.
- Our innovation focus is Curating books to Non-Parikrma students

Parikrma Mobile Book Curators

Our project impact so far

- ❑ Students who don't access to read book in their or don't have library in their school are benefited.
- ❑ We decided to give books doorstep.
- ❑ When we gave the books to the children they felt very happy .

Key Learnings

- ❖ While doing this project we interviewed with students, learnt how to maintain books and screening of books, how to be kind with the students , also we got to know that many students are interested in reading books.
- ❖ Reflection on our project is we felt happy. I loved to do this project.
- ❖ I felt happy while talking with students . I got nervous while talking.
- ❖ In the future we planned to set up a fair in our community and also we are going to tell parents also.

How have we spent our budget

The budget:

- ❖ Stationeries (gum, tape, scissors) = 500
- ❖ We were smart in using money as we assigned our school students for screening of books

Our Future Plan

1. In what ways is your pilot extensible

Yes!!!!, we will circulate books to our community on their doorstep.

2. In what ways is your pilot scalable

Yes!!!, our project is scalable as we get in contact with neighbours and community people

Thank you
